TECHNICAL SKILLS

Automation

- Proficient in test automation tools like Selenium WebDriver.
- Experience in developing automated test scripts using programming languages such as Java.
- Knowledge of software testing concepts including test case design, execution, and defect tracking.
- Familiarity with version control systems like Git for test script management.
- Strong problem-solving skills and attention to detail in identifying and resolving defects.
- Excellent communication and teamwork abilities for collaborating with developers and stakeholders.
- Proficiency in java programming languages
- Understanding of continuous integration and continuous delivery (CI/CD) processes
- Certified in relevant software testing tools such as Certified Selenium Tester
- Proficient in Behavior-Driven Development (BDD) methodology for software testing.
- Experience in writing BDD scenarios using tools like Cucumber.
- Ability to translate business requirements into executable specifications using Given-When-Then format.

PROJECTS

E-Hospital Management System

Domain : CRM Application

- Hospital management applications play a crucial role in improving operational efficiency, enhancing patient care quality, and ensuring regulatory compliance within healthcare organizations.
- Hospital Management System applications, ensuring thorough test coverage and software reliability.
- Developed and executed automated test scripts using Selenium WebDriver and Java to validate critical functionalities and workflows.
- Conducted comprehensive compatibility testing across multiple browsers.
- Documented test results, defects, and test execution reports using industry-standard test management tools such as TestRail or Jira.

V-Tiger CRM Application

- CRM systems to streamline customer interactions, enhance sales processes, and improve customer satisfaction
- Developed and maintained automated test scripts using Selenium WebDriver and Java to validate critical functionalities and workflows of the vTiger CRM application.
- Utilized TestNG or JUnit frameworks for test execution and reporting, facilitating effective test management and analysis for the vTiger CRM application
- Documented test results, defects, and test execution reports using test management tools like TestRail or Jira, ensuring clear communication and collaboration with development teams
